

Feel The Difference

With Puzer Perfect Central Vacuum System
at Home and at Work

What Makes Us Perfect

Engineered
& Designed with
Scandinavian simplicity

thorough cleanliness

comfort & hygiene

more powerful

Unlike other cleaning concepts Puzer Perfect does not stir up micro-dust during the cleaning process. Ordinary portable vacuum cleaners stir up micro-dust and not only causes users and occupants to breathe in polluted air during the cleaning process, but also long after it, as the unremoved micro-dust that has been stirred up takes many hours to settle down again.

Puzer Perfect pick up dust and dirty air through the vacuum cleaning hose, removing it from the surroundings. The dirty air is filtered at a remote location and discharged out after filtration is done.

The vacuum exhauster unit is located away from the users. So, only the vacuum cleaning hoses need to be moved from one place to another, which means all the dust, bacteria, virus etc. that has been pickup from one room or area will not be carried to other rooms or area.

All of these aspects contribute to a cleaner environment, and is proven to improve productivity and alleviate nasal, eye and other psychological symptoms.

What's more, Central Vacuum System is recommended to be incorporated in the Healthy Buildings Design certified by universities in USA, UK, Italy and Finland.

Puzer Perfect

The Revolutionary
Cleaning Concept

Puzer Perfect Central Vacuum System is developed through detailed Scandinavian engineering, and simply yet elegantly designed, to ensure everything in the system works like a symphony to deliver the expected level of performance and reliability.

The vacuum exhauster unit is the heart of the system and installed in a remote area away from the users and occupants. Thus its size can be designed to suit the task that it will perform because only the hose moves, not the machine.

It also saves space as only the hose, which does the cleaning needs to be stored, and not a cumbersome machine. Moreover the system "start/stop" button conveniently located on the cleaning hose handle allows the user to take charge of the cleaning system with ease.

The polyester-coated and child-safe vacuum inlet points ensure that young children's lives are not endangered. In addition, these valves could also be used as night lights as they consume very little electricity.

Anti-static UPVC piping network is specially engineered to ensure that it is free from any potential risk of clogging due to static electricity buildup during usage.

Puzer Perfect

So Effective & Easy To Use!

To activate the system, just plug in the hose to the inlet valve and switch on the start button on the cleaning hose handle and you're ready to clean! The central unit will suck the air and dirt through the pipes. The dirt collected will then be stored in a dust canister which is large enough not to require frequent emptying, making the maintenance process even more hassle-free.

To clean other room or areas, simply unplug the hose and move to the other room. Replug the hose to the inlet valve and you're ready to clean again.

The cleaning wands are designed in a ratchet system that is fully adjustable to suit the user's height and the area to be cleaned.

Puzer Perfect also comes with various accessories, such as brushes to work on different kind of surfaces like leather, carpets, etc.

No More Hassle

lugging your heavy portable vacuum cleaner around.

Puzer Perfect is the cleaning system that suits your lifestyle. It easy to use, light and flexible, powerful and efficient. Quieter than portable vacuum cleaners, yet its suction power in no way diminished as the motor noise is not a factor which affects its suction power, it effectively and efficiently removes particles from indoor air. It is great for people with allergies and takes up little storage space. Once you've experienced the convenience of Puzer Perfect, you wouldn't want to live without it.

With Puzer Perfect, you can use more of your time and space the way you want to, your every requirement for a comfortable lifestyle being met.

enjoy your own time and clean space

more time to spend with your family

An Amazing Difference

What an amazing difference a cleaner environment can bring...

Nobody will argue that a cleaner surrounding make them feel comfortable and put them at ease.

When we feel comfortable, we tend to feel happier and our productivity and efficiency increase. However nobody wants to spend most of their times and money to do the cleaning and make sure that the surroundings are totally cleaned.

With Puzer Perfect Central Vacuum System, you can achieve both because it's so effective and powerful that it cuts down the cleaning time.

What's more it doesn't pollute the air with dust that's been collected like conventional vacuum cleaners do because the dirty air is transferred and filtered out at a remote location and discharged there, so you can be sure that the area that's been cleaned won't get dirtied again.

Experience Puzer Perfect, and perfect your lifestyle with more time and space.

breathe easier

more productive

sleep better
